7Bioscience offers you a selection of innovative research products and equipment.

Please tick the products for which you would like more information.

Multiplex immunoassay for flow cytometry

Cell culture media, buffers, fetal calf serum (FCS) and other sera

Rec. cytokines, chemokines and growth factors

New at 7Bioscience!

ELISA for growth factors, chemokines and much more /etc.

Devices: Life cell Imager EzScope

EzDrop (replacement for NanoDrop)

Sample preparation

PCR/qPCR cycler

ChIP assays for qPCR und Next Generation Sequencing

ChIP validated antibodies and control-primer

More than 80.000 antibodies, sera and proteins for ChIP, WB, IHC, IHC-P and flow cytometry (human and mouse)

Antibodies for *in vivo* application

Direct PCR Lysis reagents

Genotyping assays for human, mouse and rat

ExtractME: DNA, RNA und Plasmid purification and isolation

PCR reagents

Electrophoresis products

RNA related products

Western Blot und ELISA substrates, protein quantification

Precast gels for Biorad (10 x 8,3 cm) and Novex/Hoefer (10 x 10 cm) systems

Fluorescent dyes and labeling kits

Cross-linking and PEGylation reagents

Protein A or G, Avidin und Streptavidin with different conjugates

HSA, BSA, IgG and secondary antibodies with different conjugates
